Career Objective

A co-op position where I can use my technical and people skills to become a valued employee and start a career at a great company. I would love the opportunity to work with highly skilled individuals and teams to further my knowledge of software development and the industry as a whole.

Technical Skills

- MS Visual Studios, VMware, MS Expression Web 4.0, MS Visio, Visual Paradigm, Eclipse IDE , Java, Oracle, Microsoft Office, MS Access, MS SQL, MS Word, MS Excel, PowerPoint
- Have experience developing software across the full Software Development Life Cycle (SDLC), using Object Oriented Design(OO), Unified Modelling Language(UML) and the Unified Process(UP).
- Great knowledge of web development with HTML5, XML and JavaScript technologies
- Experienced in designing, building and using databases in Oracle and MS Access using SQL
- Well versed in programming with C++, C#, Java and unit testing my code
- Full G license and access to my own vehicle

Soft Skills

- Enjoy being a team player and working in a team based environments
- Experienced in designing and providing the highest quality product possible under budget and time constraints
- Exceptional management and leadership abilities from being a manager and team leader
- Skilled at identifying problems and providing solutions effectively
- Very good people skills and sense of humour through years of experience working with customers and employees
- Quick and enthusiastic learner
- Very good verbal and written communication skills, as well as excellent presentation skills which were developed through school and years of experience dealing with customers face to face

Education

Software Engineering Technologies (Co-op)   **Centennial College,** Progress Campus, Toronto, Ontario
January 2013 – Present (Currently in 3rd semester)

Relevant Courses:

Software Engineering Methodologies	Programming 1&2
Advanced Database Concepts	JAVA Programming
Web interface design & application Development	Unix/Linux Operating Systems

Advanced Carpentry **Local 27 Carpenters Union, Ryerson, Toronto, Ontario**
(Diploma) 2000-2003

Related Projects

Designed a functional pharmacy database
- Was team leader designing and building a working Database from the ground up using UML and MS Access
- Created 18 different tables that had functional relationships with referential integrity
- Wrote many different search and update queries using SQL
- Created a user interface and forms to allow easy search features and manipulation of data

Developed a movie download application
- Was team leader designing and building movie download application from the ground up; using UML and an Object Oriented approach
- Users were able to search movies using many different specifications, all movie info and trailers would be displayed on the Graphical User Interface(GUI) on the users smart phone or PC
- Users were given the choice to download movies to their hard drive or rent and stream online

Work Experience

Insurance Sales **Bank of America,** Chester, UK
Account Manager 2007-2010
Education
Team Leader

- Educated new employees in insurance selling techniques and handling customers
- Was consistently a top sales associate for insurance and loans
- Supervised an mentored up to 10 associates at a time
- Kept associates updated with sales objectives, new rules and regulations, current offers and upcoming offers.
- Came up with new and interesting ways to keep my team motivated to reach our targets, which were consistently surpassed
- Personally trained some of the top sales associates

General Contractor **Self-Employed Renovator**
2003 – Present
- Worked directly with clients to bring their ideas to life in an efficient and cost-effective manner
- Had to be very budget and deadline oriented
- Trained employees to provide a high level of service with quality and speed being a priority
- Developed very good communication and problem solving skills
- Worked under pressure and in difficult situations
